Working together to

SHINE

Successful, Happy, Inspired and Nurtured towards Excellence

Hi Class 5! I hope your home learning is going well. Don't forget to use www.ttrockstars.com to develop your knowledge of times tables. I look forward to having some times table superstars in our class when we get back to school!

Enjoy your day,

Miss Elwick

Maths

Today's work is on odd and even numbers. There are some pages to read, to remind you how to recognise odd and even numbers. Then there are some questions to answer – you can choose to answer some, or all of them. It ends with some mastery style questions if you like a challenge!

The answers are included on the document at the end of each section – so don't peek until you are finished! Then you can mark your work with an adult if you like.

English

You have been given a picture and the start to a story. Can you write what happens next? I have included a target box, just like we use for our extended writing, to remind you what you should include in your story. Remember to read through your work and check for improvements you can make to your writing.

Topic work - Growing

Using the information sheet about Sunflowers that you read on Monday, can you draw the lifecycle of a sunflower plant? Then add labels to explain what is happening during each part of the cycle. I have included a picture of the lifecycle of a bean plant below to help you see what your lifecycle should look like.
