Working together to

SHINE

Successful, Happy, Inspired and Nurtured towards Excellence

Hi Class 5. I hope you are all healthy, happy and enjoying the weather! This is the next part of our home learning and it is a new way of doing things for me as well as for you. Just try your best and do whatever you can. Remember that staying active at home is important as well. Have you tried joining in with the PE workouts by Joe Wicks on youtube? Lots of children are enjoying them, and some adults too! You can also try to read every day and talk about what you have read with an adult as it will help you become a superstar reader.

Enjoy your day,
Miss Elwick

Maths

Complete the problems saved on the separate maths document.

You can print the sheet out if you have access to a printer, or you could just write the answers on paper, or in your maths homework book.

English

Part of our learning this half term is about growing. Please read the text - Sunflower Plant Life Cycle and answer the comprehension questions on page 2 of the document.

The answers are at the end of the document – **don't peek at them!**

When you are finished, you could go through the answers with an adult.

Topic work - Growing

Draw or paint a growing plant. You could use a house plant, a garden plant or even a picture from the internet. Look closely at the different parts and try to draw how they actually appear, not just how you think a plant should look. Can you identify and label these parts?

- Stem
- Leaf
- Flower
- Bud
- Petals

Where are the roots? Are they thick or thin? What colour are they? Add them to your picture.

If you like, you could even make a model of a plant using materials like playdough, construction toys, paper, card tubes etc. Can you include the important parts of a plant on your model?
