Can you solve these addition and subtraction problems?

Odd One Out

Which is the odd one out?

Explain why.

Spot the Mistake

Amir

589 − 70 is equal to 582

What should the answer be?

Answers

Q1. The pictures show:
200 + 700 = 900
200 + 600 = 800
300 + 500 = 800
You could have two answers, the first one is the odd one out as the totals are both 800.
The last one is the odd one our because it uses 300 as the starting number and the others use 200.

Q2. 589 − 70 = 519

Amir subtracted 7 not 70

English

Today we are going to use BBC Bitesize to help us investigate adjectives

https://www.bbc.co.uk/bitesize/articles/zvv8d6f

Watch the videos and complete the online activities. There is a worksheet which you can print if you are able to, if not you can choose 5 of the sentences and re-write them with a different adjective.

Answers

I hope you enjoyed watching the videos and completing your online work. As a grown up to check it for you.

Foundations Subject – History – Anglo Saxons

Read the presentation about the Anglo Saxons and Scots.

Complete the sentences on the worksheet using the information you have just learnt.
If you are able to print the worksheet you can, if not you can write out the sentences.

We are going to learn more about Anglo Saxon's over the next few weeks. You might also want to do some research of your own on this topic!

Answers
1 – Romans
2 – Scots
3 – Kingdoms
4 – Vortigern
5 – Picts
6 – Britain
7 – Angles
8 - Saxons
