SHINE

Successful, Happy, Inspired and Nurtured towards Excellence

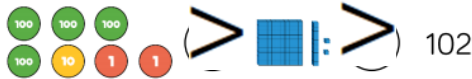

Year Three answers 24/4/20

Maths

Fluency

Use the symbols $<$, $>$ or $=$ to make the statement correct.

Reasoning

The first number could be anything between 215 and 242

The second hidden number could be anywhere between 257 and 288

Mastery

False. For example, if you are ordering numbers in the hundreds you should start by looking at the hundreds column, but sometimes two numbers will have the same number of hundreds and so you will also need to look at other columns.

English

The picture suggests that the boy could get swept out to sea and under the water. However, we know that the title of the book tells us that something will be washed up on the shore. This is the next picture. Can you tell what has been washed up?
