

Rounding to the nearest 100

1,2,3,4 round down

5,6,7,8,9 round up

When rounding to the nearest 100, circle the **HUNDREDS** digit and underline the **TENS** digit.

Look to see what the **tens digit** is – do you need to round up to the next hundred or round down?

Remember when rounding down the hundreds digit will usually stay the same. Also remember, hundreds numbers end in two zeros!
