

Wednesday 13th May

Maths - Subtraction

Rosie thinks $352 - 89 = 337$

	H	T	O
	3	5	2
-		8	9
	3	3	7

Is she correct?
Explain why.

Use $<$, $>$ or $=$ to make the statements correct.

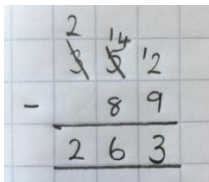

$$234 - 47 \quad \bigcirc \quad 234 - 57$$

$$472 - 84 \quad \bigcirc \quad 473 - 84$$

$$406 - 89 \quad \bigcirc \quad 416 - 99$$

Answers

Q1 – Rosie is incorrect. She has not made any exchanges and subtracted the 2 from the 9, and the 5 from the 8 even though she should subtract 89 from 352. She should have exchanged from the hundred's column.

Q2 –

$$234 - 47 > 234 - 57$$

$$472 - 84 < 473 - 84$$

$$406 - 89 = 416 - 99$$

English - Reading Comprehension

I have uploaded a document called 'Premium Property For Sale'. This is about Anglo-Saxon houses. What type of text do you think this is?

Read the text and complete the comprehension questions on the right-hand side.

Answers

The answers have been uploaded.

Foundations Subject – Art

Think back to the art we completed in our first week of online learning. I have uploaded a PowerPoint which has a description of how Impressionist's painted and some famous impressionist pictures.

Choose one of these pictures and create your own copy of it. If you can use paint that is great, but if you don't have paints think what you could use instead? Felt pens, crayons, chalk or coloured pencils would work too.

Answers

Save your completed artwork to bring back to school. You could also ask a grown up to post a picture of it on facebook, I would love to see them!
