

Wednesday 20th May - Answers

## Maths

Dora thinks there is more than £5 but less than £6  
Is Dora correct?

Convince me.

Rosie has £5

Has she got enough money to buy a car and two apples?

£3 and 35 p

85 p

£2 and 55 p

75 p

What combinations of items could Rosie buy with £5?

## Answers

### Q1

Dora is incorrect.

The note is £5 or 500p.

The coins are 50p + 20p + 20p + 20p + 10p + 10p = 130p

In total Dora has 500p + 130p = 630p. 630p is the same as £6.30

Dora has more than £6

### Q2

A car and two apples would cost 335p + 85p + 85p = 505p.

Rosie does not have enough money for a car and two apples.

There could be a few possible answers for items Rosie could buy with her money. Ask a grown up to check these for you.

## English – Apostrophes

In Monday's task we looked at how to use apostrophes to show possession. Apostrophes are also used to combine words (contractions), Follow the BBC Bitesize videos and activities to practise this skill. The worksheet has also been uploaded as supporting documents.

**Answers – The answers to this task are on the BBC Bitesize site.**

## **Foundations Subject – History**

### **Anglo Saxon Art and Craft**

The Anglo-Saxons were highly skilled craftsmen and women who created jewellery, ceramics, sculptures and wall paintings. A number of these relics have been found at archaeological sites. Look at the powerpoint I have uploaded about Anglo-Saxon art and choose a piece of art to recreate. You could draw a picture of an Anglo-Saxon engraving or a tapestry, or you could use craft materials to make an Anglo-Saxon item such as a buckle or brooch.

There are more photographs of Anglo-Saxon relics on this website:
