

Maths

What is the area of this shape if:

- each square is 2 cm in length?
- each square is 3.5 cm in length?

Mo buys a house with a small back garden, which has an area of 12 m².

His house lies in a row of terraces, all identical.

If there are 15 terraced houses altogether, what is the total area of the garden space?

Find the area of the compound shape:

How many ways can we split the compound shape?

Is there more than one way?

Calculate the area of these symmetrical shapes.

English

Alma-

We are continuing to think about how we can use imagery to help improve our creative writing. We have tried using our senses. By the end of this lesson you should be able to say what personification is and give some examples. So, what is personification?

Personification

Aim: Choose and use words and phrases that capture the reader's interest and imagination.

Definition

Personification is a figure of speech in which an object, an idea or an animal is given human qualities.

If you can imagine an object doing actions or behaving like a person, that's personification.

Activity

1. Match the object to the human quality to complete the sentence.

Object		Human quality
The candle flame		nodded in the wind.
The chocolate cake in the fridge		crept into the classroom.
The party		danced in the dark.
The wallflowers		sang a lonely song.
Along with the teacher, silence		was calling her name.
The wind		died as soon as he left.

2. Once you have matched the parts of the sentence, underline the object and underline the verb in each sentence.

Challenge:

3. Use a picture and choose a verb to create your own sentence using personification to describe the object. Use the best verb to create the image that you want to put in the reader's mind.

For example:

The summer sun hugged the meadow.

	sang		watched	
hugged			screached	
	yelled			
	smiled			swallowed

Foundation Subject –

Science- Metamorphosis

Metamorphosis

Metamorphosis is a process by which animals undergo an abrupt and obvious change in the structure of their body and their behaviour.

Some animals undergo complete metamorphosis, in which they completely transform. Other animals experience incomplete metamorphosis, where they go through several different stages, with each stage getting bigger than the last.

Use the Clue Cards to find the missing words and complete the life cycles (see the resource sheets for today's lesson). Draw and label one of your choice.
