# Year 2: Week 5, Day 5 Describe 2-D shapes

#### Each day covers one maths topic. It should take you about 1 hour or just a little more.

1. If possible, watch the **PowerPoint presentation** with a teacher or another grown-up.

OR start by carefully reading through the Learning Reminders.

- Tackle the questions on the Practice Sheet. There might be a choice of either Mild (easier) or Hot (harder)! Check the answers.
- 3. Finding it tricky? That's OK... have a go with a grown-up at A Bit Stuck?

4. Think you've cracked it? Whizzed through the Practice Sheets? Have a go at the **Investigation**...

2.2 2.3 2.4 2.5

Write a number that goes between 2.3 and 2.4.

## **Learning Reminders**

## **Learning Reminders**

## **Practice Sheet Answers**

#### Shape practice (Mild)

Children are not expected to include all of these points in their descriptions. They will also use their own words to describe each feature. Encourage them to use the appropriate vocabulary through your feedback.

#### Shape practice (Hot)

Children are not expected to include all of these points in their descriptions. They will also use their own words to describe each feature. Encourage them to use the appropriate vocabulary through your feedback.

### A Bit Stuck? Make the shape

#### What to do:

• Cut out four squares and join them together to make a new shape. Sides must line up, e.g. like this:

Draw around the outline of your four squares, then take them away. What shape have you drawn?

How many sides does it have?

Repeat.

How many different shapes can you draw? Can you draw a hexagon? An octagon? A square?

Now try drawing shapes using one triangle and two squares, e.g. like this

(Tip - this shape is a hexagon! Why?)
