Year Three answers 1/5/20

Maths

Reasoning

$$\underline{\quad\quad} + \underline{\quad\quad} = 800$$

Each of the missing numbers are multiples of 100

Find all the possible missing numbers.

$$0 + 800$$

$$100 + 700$$

$$200 + 600$$

$$300 + 500$$

$$400 + 400$$

$$500 + 300$$

$$600 + 200$$

$$700 + 100$$

$$800 + 0$$

Mastery

Odd One Out

Which is the odd one out?

Explain why.

$$\begin{array}{|c|c|} \hline \square & \square \\ \hline \end{array} + \begin{array}{|c|c|c|c|c|c|c|c|} \hline \square & \square & \square & \square & \square & \square & \square & \square \\ \hline \end{array}$$

$$\begin{array}{|c|c|} \hline \square & \square \\ \hline \end{array} + \begin{array}{|c|c|c|c|c|c|c|c|} \hline \square & \square & \square & \square & \square & \square & \square & \square \\ \hline \end{array}$$

$$\begin{array}{|c|c|c|} \hline \square & \square & \square \\ \hline \end{array} + \begin{array}{|c|c|c|c|c|c|c|c|} \hline \square & \square & \square & \square & \square & \square & \square & \square \\ \hline \end{array}$$

Possible answers:

The odd one out could be $300 + 500 = 800$ because it does not have the number 200 in the calculation.

The odd one out could also be $200 + 700 = 900$ because the answer is not 800

English

1. The picture is taken underwater, so how are the lamps lit up? **There are glowing fish inside the lampshades. They are what is making the light.**
2. Where has all of the furniture come from? **If you look carefully, there is a removal van in the back of the picture. It must have fallen off a ship or rolled into the sea with all of the furniture inside!**
3. Do you think the creatures in the photograph know they're getting their picture taken? How do you know? **I think they do. If you look at the octopus sitting on the chair closest to the camera, it seems to be looking right at whomever or whatever is taking the picture. One of the little fish on the couch seems to be doing the same thing!**
