Year Three 1/5/20

Maths

Reasoning

$$\underline{\quad\quad} + \underline{\quad\quad} = 800$$

Each of the missing numbers are multiples of 100

Find all the possible missing numbers.

Mastery

Odd One Out

Which is the odd one out?

Explain why.

English

This seems to be a very strange underwater camera... I wonder who took the picture? As the boy looks on, there are more strange photographs. Look very carefully at the next photograph in the pile (additional resource p1) and think about what you see. See if you can answer these questions.

1. The picture is taken underwater, so how are the lamps lit up?
2. Where has all of the furniture come from?
3. Do you think the creatures in the photograph know they're getting their picture taken? How do you know?

Foundation Subject – PSHE (Happy Schools)

In Happy Schools we are going to look at coping and how we can cope in school or home when things might get difficult. This week I'd like you to think about how we cope when things get tough (like now!). We're going to think about mantras. A mantra is a positive saying that we repeat to ourselves either out loud or in our head to help us to focus and remember that everything is going to be alright.

Use the internet to research some famous positive sayings/quotes/mantras. We've looked at a few of these before in assemblies. See if you can find any mantras from famous people. Which ones are your favourite? Why? Now write your own. Think about a positive mantra that will help you or your family get through this strange time until we get back to normal. If you can, you could put your mantra on a poster and make it colourful and beautiful. Maybe you could put it up somewhere in your house where everyone can see it, or maybe you could make two copies of it and put one in your window for other people to see while they're out on a walk- you could make a positive difference to someone's day! I'm going to put a comment on Facebook today about this- see if your adults could comment a picture of your posters on my comment so that you can cheer everyone up!

Foundation Subject – Computing

Because we're not all together, it's going to be tricky to do more learning using the word processing programs. So I'm going to give you some online lessons to do on debugging and algorithms. If you have access to a computer, I'd like you to use the program Turtle Logo to draw shapes, use different colours, produce texts and draw arcs. **If you don't have access to a computer, don't worry at all. This won't be the only time you get to try programming!**

If you can do this, go to www.turtleacademy.com and select the 'lessons' option at the top. At your own pace, work your way through the lessons. Keep going with this until you have completed them- there isn't a time limit on this but we'll see how far you've got when we get back to school!
