

Drawing Insects in Colour

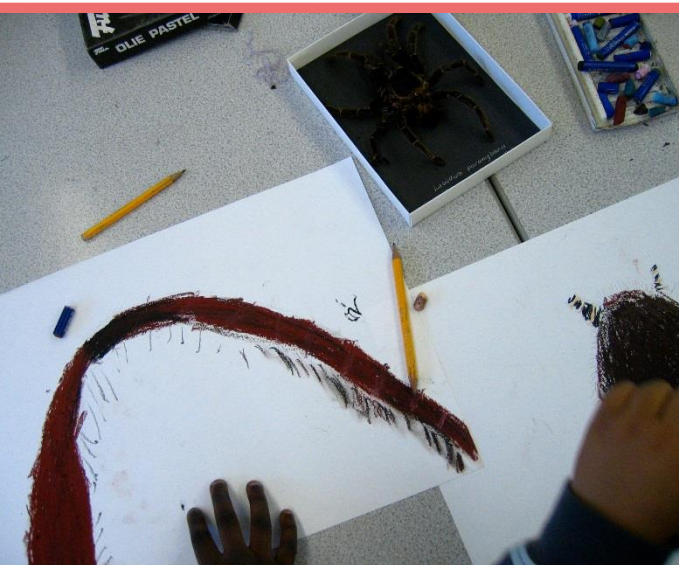

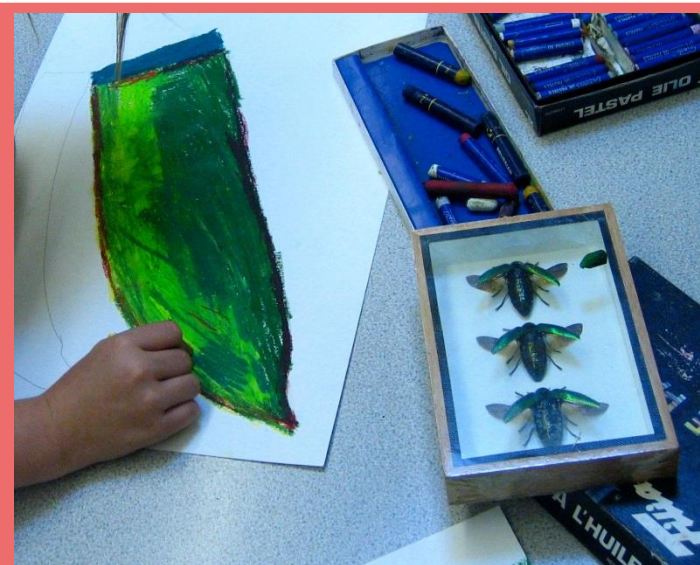

twinkl

Thinking About Insects

What are the differences between the two?
How would you describe their shapes?
Describe their bodies.
Look at the patterns, colours and lines.

**What a good
insect drawing
in colour looks
like...**

Task - Drawing Insect Snapshots in Colour

Chose a snapshot picture from the following slides. If you can print it then stick your snapshot to your piece of paper.

You need to draw the missing part of the insect.

If you can't print it out, then just have a go at drawing the snap shot and then trying to continue to fill in the missing part.

You can use whatever colours you have available to use at home. If you don't have any colours then you could practise your drawing skills just using a pencil and try to shade.

Drawing Insect Snapshots in Colour

Use your knowledge about how insects look to help you. Use the patterns and shapes that you can see and continue them.
