Yr 1, 05.06.20 answers

Maths - recognising notes

5 pounds
10 pounds
20 pounds

One ten pound = 2 five pounds
One twenty pound = 2 ten pounds

Reasoning

Teddy is given one [£20 note] for Christmas.

Eva is given two [£5 notes]

Teddy: I got more than you did because my number is bigger.

Eva: I got more than you did because I got two notes.

Who is correct?
Explain your reasoning.

Both Teddy and Eva are wrong because they both have £10.

Eva has two £5 notes, which makes £10, and Teddy has a £10 note.

Problem Solving

Always, sometimes, never

Money in notes is worth more than money in coins.

Sometimes - if you have £6 in coins it is worth more than a £5 note.
However you could also have less than £5 in coins.

English

Self- assess your work.

Did you use capital letters at the beginning of a sentence?
Did you use a full stop at the end of a sentence?
Do you have spaces between words?
Have you used adjectives?
Have you used time connectives?
Are your events in the right order?
Have you written in the first person? **I/We** or the third person? **She/he/they**

Well done!
