### Maths- Sorting 2-D shapes

Sort the 2-D shapes into the correct group:

How have the shapes been sorted?

Whitney sorted her shapes by the number of sides.  
What shapes could belong to each group?

4 sides	Not 4 sides

### Reasoning

Ron sorted the shapes in order of the number of sides. Has he ordered them correctly?

Explain why.

Which shape is in the wrong set?

Explain why.

Vertical line of symmetry	No vertical line of symmetry

## Minibeasts

Minibeasts are animals with no backbones. They are all around us, such as spiders, beetles, snails, worms, butterflies and much more.

### In the Garden

A garden is a great place to find minibeasts. If you look closely around flowering plants you might see honeybees and bumblebees.

### In Ponds and Rivers

Some minibeasts, found near ponds or rivers, can be born in water and grow so they are able to fly and live on land. You might find dragonflies or even spiders living near ponds or rivers that grow into four-winged insects that live in tall trees near water.

### Did You Know...?

A peacock butterfly has eye-shaped patterns on its wings to fool other animals who may want to eat it.

# Questions

1. What are minibeasts? Tick **one**.

- animals that have hair or fur
- animals with no backbones
- animals with no legs

2. Where can you find minibeasts? Tick **two**.

- in the garden
- inside the body
- in ponds and rivers

3. What minibeasts can you see near flowering plants? Tick **one**.

- worms and beetles
- honeybees and bumblebees
- spiders and dragonflies

4. Where can dragonflies live? Tick **one**.

- underground
- in tall trees
- underwater

5. Which two minibeasts might you find near a pond or river? Tick **two**.

- bumblebees
- dragonflies
- spiders

## Foundation Subject – Science

Make a poster about your favourite minibeast, or the one you find most interesting. Draw a labelled diagram of the minibeast and include some interesting facts that you have researched. Try to find some facts that other people might not know about that creature.
