

## Shotton Hall Primary School

Working together to

**SHINE**

**Successful, Happy, Inspired and Nurtured towards Excellence**

Hi Class 5. I hope you have been keeping busy and are ready for your new learning activities this week. We are continuing our work about the seaside. I love going to the beach and enjoy searching for interesting pebbles and shells. Do you know how beaches are made? This bbc bitesize clip tells you how! <https://www.bbc.co.uk/bitesize/clips/zc2pvcw>

Enjoy your day,  
Miss Elwick

### **Maths**

Complete the problems saved on the separate maths document.

You have another 'Beat it' test to complete. Remember to use a timer. Are you getting quicker at answering the questions?

### **English**

I have given you a seaside picture. I would like you to look carefully at the picture and think of different questions you could ask about the things you can see. For example: Where are they sailing to in their boat? Write your questions as sentences. Can you think of some question words you could use that are not on the sheet? Remember to use capital letters and the correct punctuation.

### **Topic work – Seaside**

What can you remember about human and physical features of our environment? Read the information given and then think about what you find at the seaside. Can you sort seaside features into groups that are human features and groups that are physical features? As an extra challenge, can you think of some your own that you could add to these groups?
