Friday 8th June

Maths - Time

Q 1 - How many quarters of an hour are between 7 o'clock and 9 o'clock.
Explain how you found the answer.

Q2

The train to Blackpool leaves at quarter past and
quarter to every hour.

Make a list of the times of the trains Oliver can catch
if he gets to the train station between 2 o'clock and
half past 4

Answers – Q1
There are 8 quarter of an hours between 7 o'clock and 9 o'clock. My working out was, there are two hours between 7 o'clock and 9 o'clock and 4 quarter of an hour's in each hour. I then calculated 2 x 4 = 8.

English - The Lost Happy Endings

In my video I will read the beginning of 'The Lost Happy Endings' this tells us a little more about Jub's job. I have also scanned these pages and uploaded them so you can read through them yourself and look at the pictures.

Look closely at the picture of Jub emptying her sack of happy endings. These show the last sentences from stories, the happy endings, such as 'and the animals never went hungry again' and 'riches beyond their wildest dreams'

Can you write some happy endings? Write at least 5 sentences which would end a story happily – you are not allowed to use 'happily ever after' or 'the end'.

If you want to, you can draw a picture like those in the book of your happy endings

floating away to the trees.

Answers – There are no wrong answers again today! Ask a grown up to check your work.

Foundations Subject - RE - Hinduism

A main feature of Hinduism and how it differs from other major religions is that Hindu's believe in many gods/goddesses (also known as deities). Look through the attached power point for information on these.

Choose one of the deities and complete the attached worksheet about them. (If you can't print it off just copy the questions). You can also research your chosen deity further if you want to.

Answers – Check your answers against the information in the powerpoint and ask a grown up to check your work.
