

## Maths

	Rounded Approximation	Does the original answer look correct based on rounded estimation?	Corrected Answer if necessary (You may need to recalculate)
1.	$370 + 290 = 660$	Yes	
2.	$550 + 340 = 890$	Yes	
3.	$780 + 330 = 1110$	Yes	
4.	$230 + 170 = 400$	No	407.7
5.	$900 + 400 = 1300$	Yes	
6.	$350 + 380 = 730$	No	723.76
7.	$1760 + 40 = 1800$	No	1800.21
8.	$4870 + 150 = 5020$	Yes	

	Units	Rounded Answer	Reasoning
1	metres	8 metres	If the shop sells rope in metre lengths only, Charlie will have to round his answer up to make sure he has enough.
2	minibuses	11 minibuses	The answer needs to be rounded up to ensure everyone can get on a bus.

#### Answers

2. Here are some ideas that you might have thought of. You may have thought of some other great ones too! That's fine.

Please! Help me. I'm trapped.

Get out of here quickly! It's not safe for you to come any closer.

Can you come a little closer so that I can see you better?

What's your name?

3. Do you think you that you hit all of your targets? Here's my example.

Jim could see the doll now. For some reason he felt uneasy. Afraid almost.

**“What’s your name?” the doll whispered suddenly, breaking the silence. Jim blinked, unable to believe what he had heard!**

**“My name is Jim,” he managed to stutter, shuffling closer to the doll.**

**“Get out of here quickly! It’s not safe for you to come any closer,” the doll begged as Jim continued to move towards it, unable to stop himself.**

**“But you’re so life-like and you look just like me!” Jim exclaimed as he stepped ever closer.**

**“No! Stop!” the doll cried but it was too late.**

Suddenly Jim’s head began to hurt, and it felt like he was spinning uncontrollably. What was happening to him?

## Topic

2. Look at the map and write the correct cities next to the numbers

1. La Ville De New York
2. Rio De Janeiro
3. Sydney
4. Paris
5. New Delhi
6. Tokyo
