

# Earth Art

Today we will be...

Making a collage using natural materials.

Do you  
know what  
**collage** is?

Collage is an art technique that involves cutting and gluing different materials together to make a picture.

This picture has been made using different types of paper and string.

Collages can be made using a range of materials. Materials can be cut and assembled onto paper to make a larger picture. You could use any of these materials below.

paper

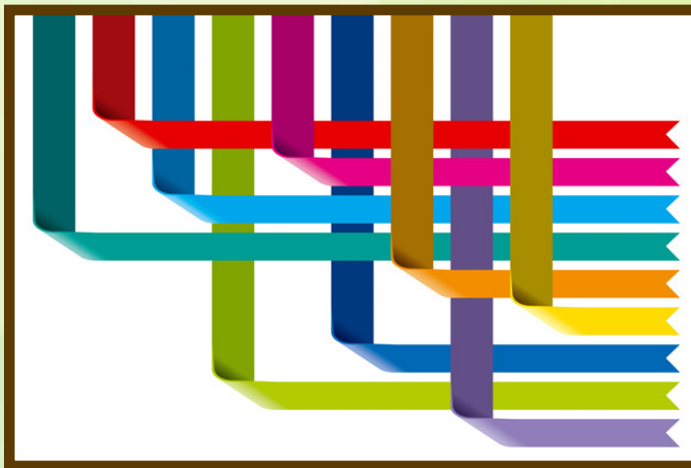

flowers

wood

ribbon

string

buttons

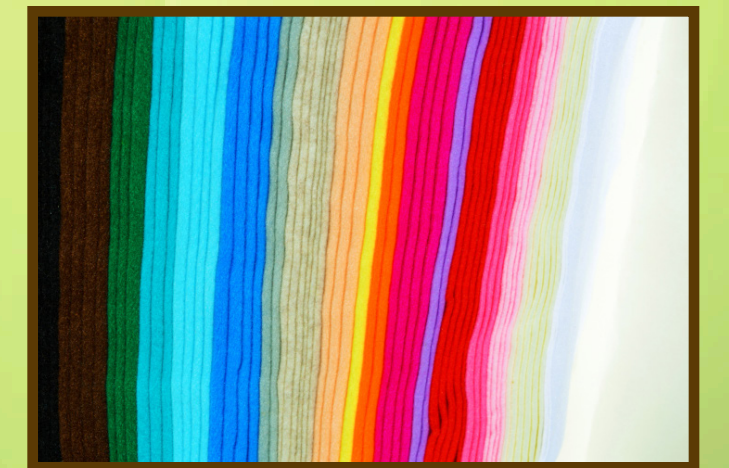

leaves

grass

fabric

You can use natural materials from the garden or playground to make a collage. The leaf animals you made earlier in this scheme of work are collages too.

**Do you remember?**

# Here are some steps showing how to make a garden scene with collage.

1

Start by drawing a rough outline of your scene.

2

Paint glue onto your page and stick leaves down to make grass.

3

Apply plenty of glue and stick conker shells down to make rocks.

4

Cut some leaves and glue them in a tree shape.

5

Use some beads and sequins to make the flowers.

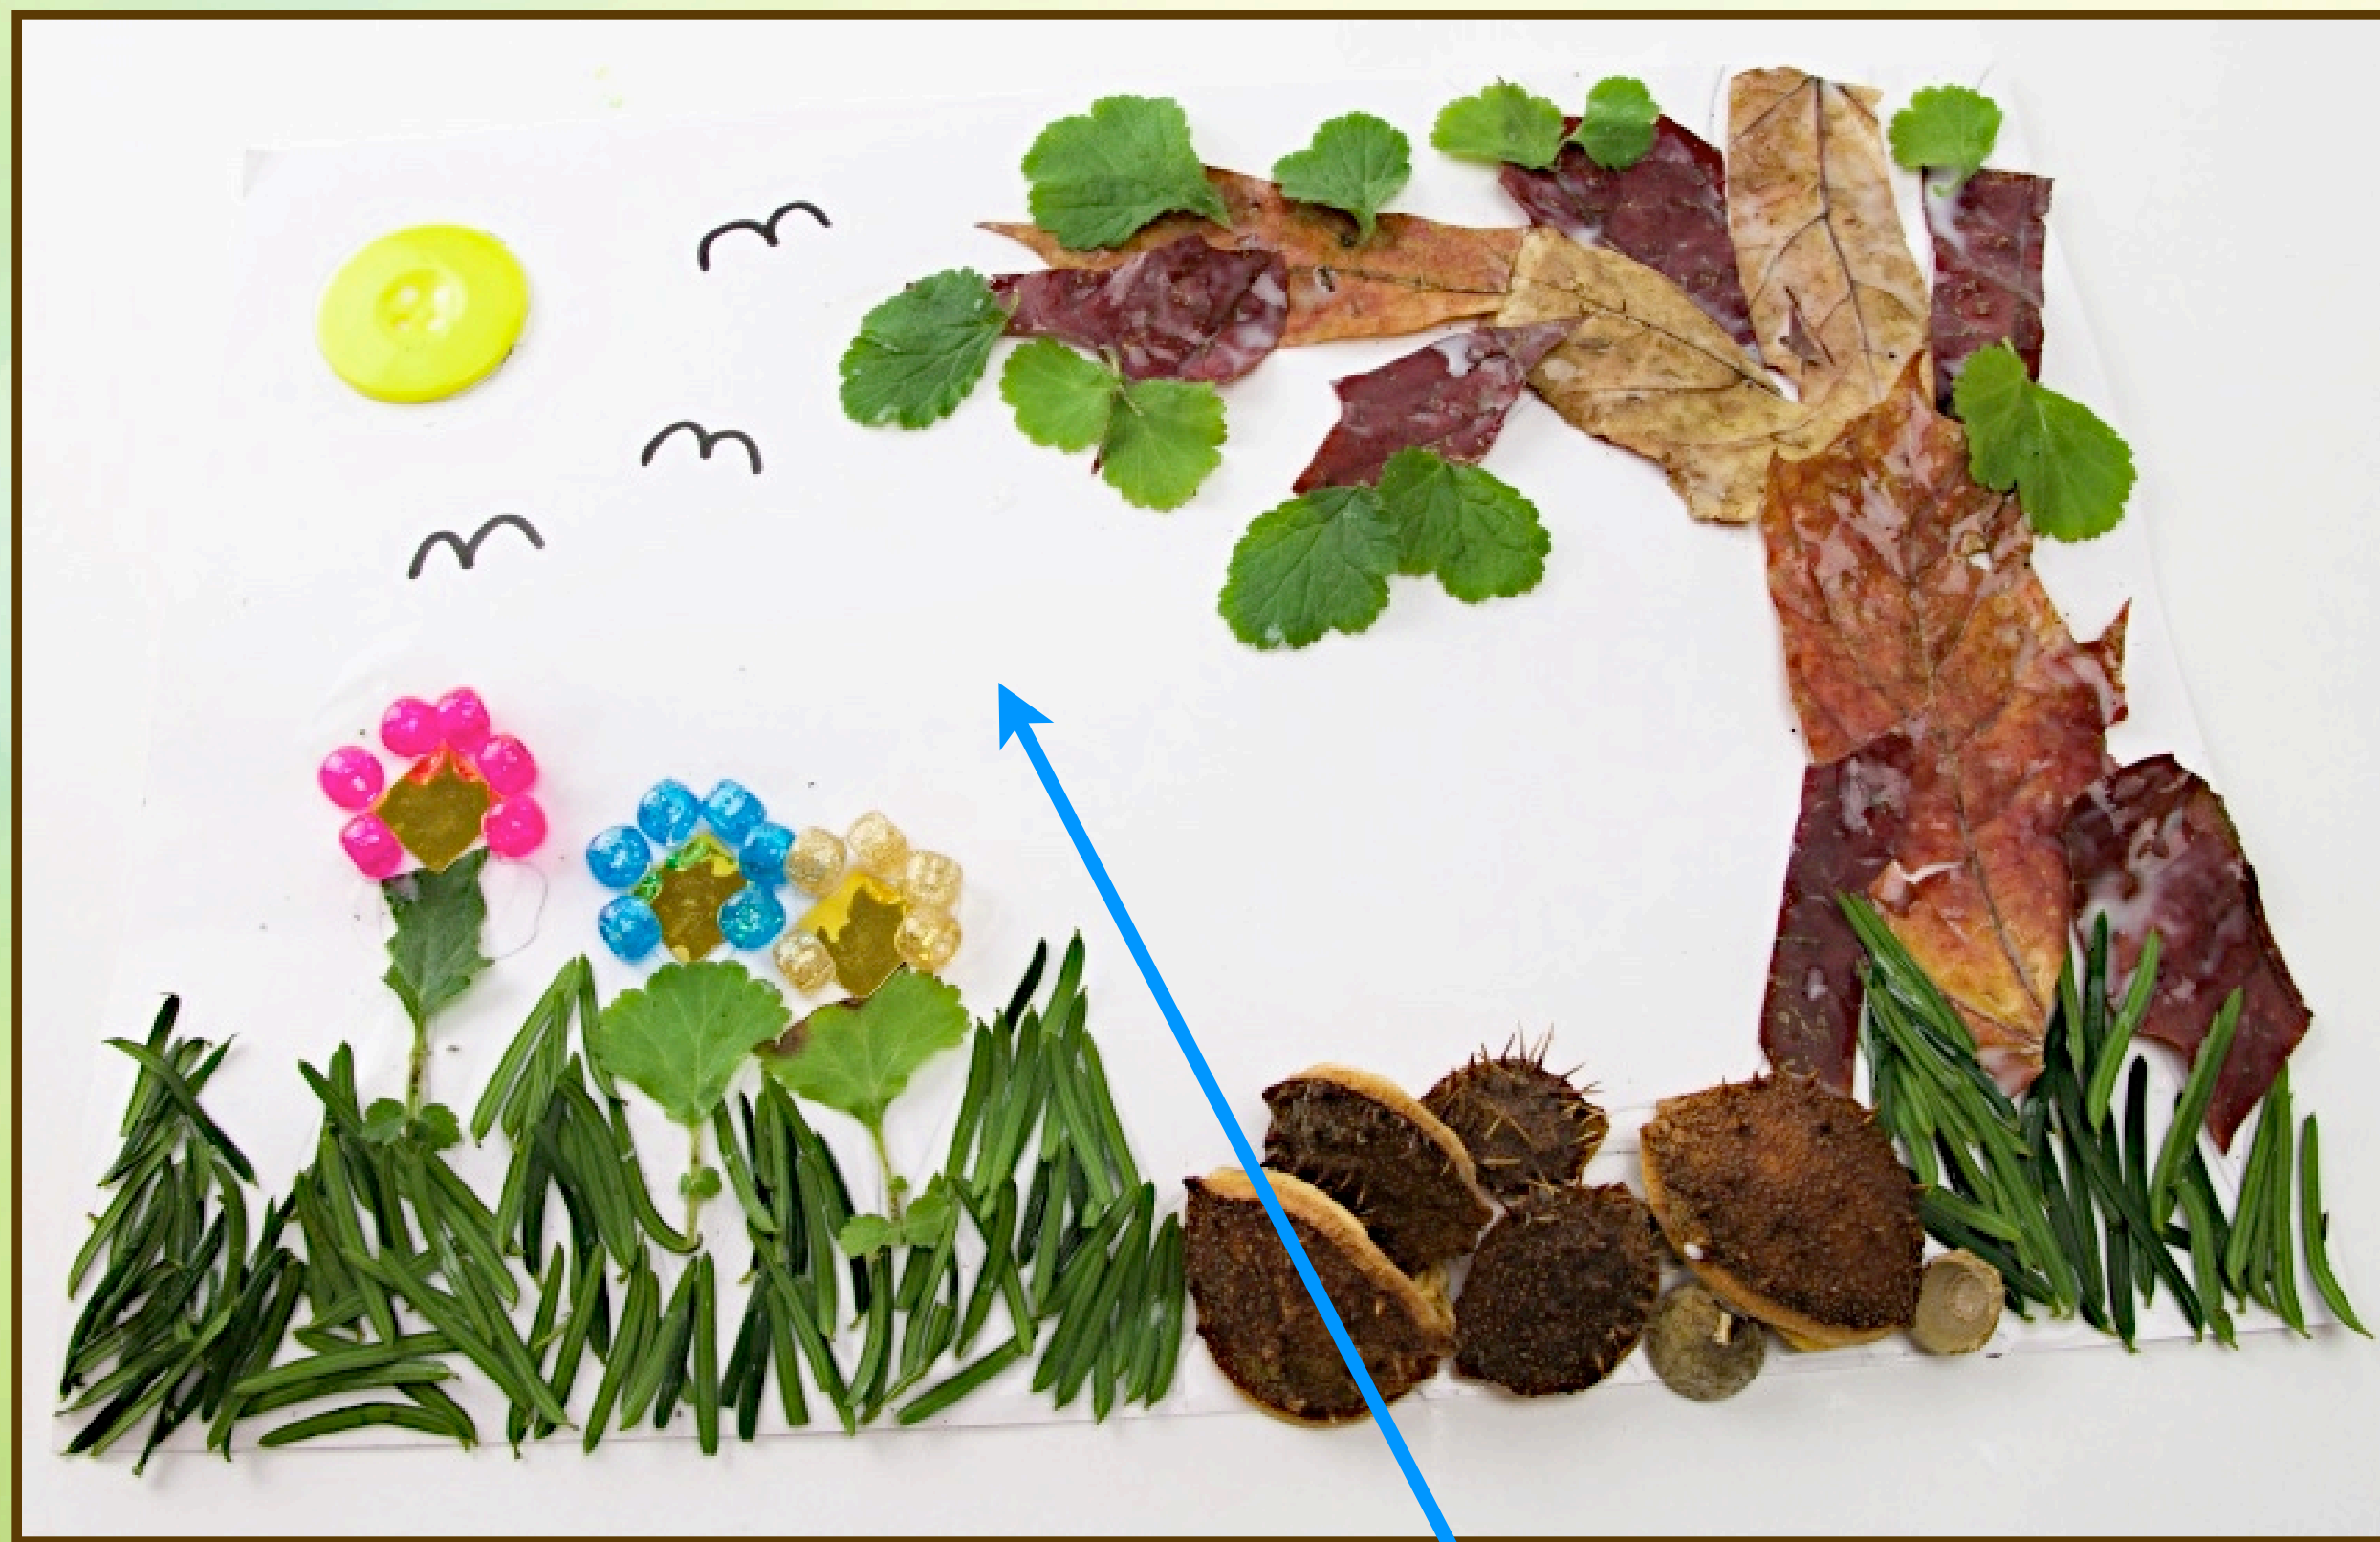

6

Add some extra leaves to the tree for extra detail.

What kind of scene would you like to make using collage?  
**Think, pair, share**

When all the excess glue is dry you may like to paint the sky blue and add detail to the birds in the distance.

# Plenary

1. Find a partner to work with.
2. Collect a 'Two stars and a Wish' card from your teacher.
3. Look at your partner's collage and finish the sentence in each box.
4. Allow your partner to do the same for your piece of work.
5. Share your thoughts about the art work you and your partner have made.
