

Maths – Comparing durations of time – Answers

Fluency

The four months that have 30 days are *September, April, June and November*.

The shortest month is *February*.

March has **31** days.

The number of days in February is different when it is a *leap year*.

June has **30** days.

Reasoning

July has 31 days. *Always*

July starts and finishes on the same day of the week. *Never*

July starts on a Wednesday. *Sometimes*

July has 5 Thursdays in it. *Sometimes*

Mastery

April has 30 days, May has 31 and June has 30 so she could be right. However, there is another possible answer – September has 30 days, October has 31 and November has 30 so this part of the calendar could show September, October and November.
