

Year Three 12/6/20

Maths

Remember what each inequality sign means and use the correct one to complete the statements.

Write $<$, $>$ or $=$ to complete the statements.

- a) 1 week 8 days
- b) 8 days 2 weeks
- c) 3 weeks 1 month
- d) 5 weeks 1 month
- e) 12 months 1 year
- f) 2 years 22 months
- g) 36 months 3 years

English

Today we're going to read a myth that gives us a warning. You might have heard the phrase 'you flew too close to the sun' which means you did really well at something but pushed it too far and failed. This myth is where that phrase comes from. I've included the written story and today I'd like you to turn it into a comic strip. Think about what a comic strip needs- there's not much room for a lot of text so choose your sentences carefully. You need to shrink the story down but keep all of the important parts so the myth is clear. On Monday I'll show you the version of the comic strip I have so you can compare yours and see how clearly you tell the story.

(By the way, see if you can spot a reference to a myth we've already read!)

Foundation subject - History

This week we're going to look at the importance of Roman roads. The Romans were the people who introduced roads to Britain and we still see examples of their road routes all across England. I'd like you to look at the resource I've uploaded and learn about their roads.

I've also included a map. I'd like you to use an atlas or Google maps to help you to find the locations of some Roman roads. I'd like you to find:

- The Fosse Way, Exeter to Lincoln
- Stane Street, Chichester to London
- Dere Street, York to Scotland

If you can print it out, mark and label the places on your map and then draw and label the road. Use a different colour for each road. If you can't print the map, just make sure you know where the roads go.
