

# What am I?

Minibeast riddles

I have 6 short legs and I can also fly.

I can be found crawling on leaves and flowers looking for food.

I like to eat greenflies.

I am round, red and shiny with jet black spots but others in my family can be different colours.

I have 6 short legs and I can also fly.

I can be found crawling on leaves and flowers looking for food.

I like to eat greenflies.

I am round, red and shiny with jet black spots but others in my family can be different colours.

I am a ladybird

I am often busy flying quickly from flower to flower looking for sweet nectar to drink.

I am an insect with 6 legs and a stripy, furry body.

I have 4 wings that can beat up to 240 times per second and this movement is what makes my buzzing sound.

What am I?

I am often busy flying quickly from flower to flower looking for sweet nectar to drink.

I am an insect with 6 legs and a stripy, furry body.

I have 4 wings that can beat up to 240 times per second and this movement is what makes my buzzing sound.

I am a bee

I have 2 long legs and 4 short legs.

I can be tricky to see because my colour helps me be camouflaged in my habitat.

I can both jump and fly, which I use to find tasty plants to eat and to escape predators.

When I scrape my long back legs against my wings I make lovely music.

What am I?

I have 2 long legs and 4 short legs.

I can be tricky to see because my colour helps me be camouflaged in my habitat.

I can both jump and fly, which I use to find tasty plants to eat and to escape predators.

When I scrape my long back legs against my wings I make lovely music.

I am a grasshopper

I have 7 pairs of short, little legs that I use to scurry around.

I have hard, protective shell on my back called an exoskeleton.

I live in damp, dark places and like to eat old, rotting plants and wood.
