

Maths

Today we will continue to think about length and height.

Can you use something in your house to build a tower the same height as you? You could use blocks, tins, boxes or any other items you have which can be stacked safely.

How tall is the tallest tower you can build? Taller than you? Taller than the chair? Taller than the cupboard?

Vehicle Challenge

Use a toy vehicle which can move and be pushed. Who can push it the furthest? How will you measure this? Think about using string, pencils, footsteps or other ways to measure. You might like to record your results on a chart like this:

name	how far
Sam	3 pencils
Mam	4 pencils
Dad	2 pencils

Have a competition with people in your family!

We would love to see some photos of your work on our Facebook page!

Answers

Everyone will have different answers for this activity. We hope you enjoyed measuring and comparing and used some words correctly such as taller, shorter, longer, tallest, shortest, longest, height and length.

Literacy

Listen to the story 'The Train Ride' from the link below.

<https://www.youtube.com/watch?v=jHbE8kaBDKU>

Have a go at saying or singing the words yourself using the link below.

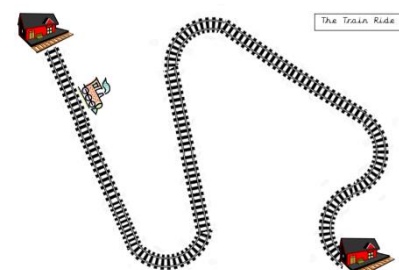

<https://www.youtube.com/watch?v=tlxuZzdLKHA>

Think about the journey the train went on. Can you make a map to retell it?

Start at the station and draw and label everything the train went past until it reached the end of the journey. We have provided a blank map to help you in the resources section.

If you have a toy train you might also like to make a model to show the journey with props from your house or pictures!

Practise using your map or model to retell the story.

Answers

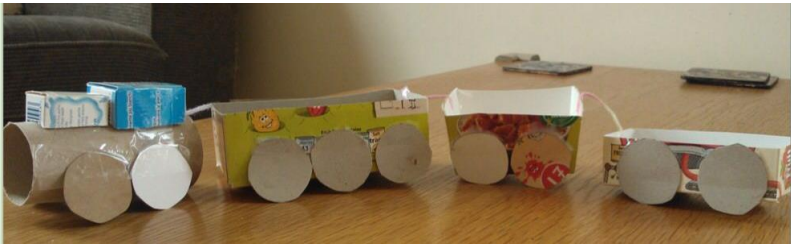

Everyone's map will look different but we hope you included lots of things from the story such as a shiny red tractor, a hot air balloon, a tunnel, a ticket collector and a lighthouse. We would love to see some photos of your work!

Foundation Subject – Creative

Have a go at making a model of a train. It can be any size you like and any type of train. You might like to use boxes, building blocks, furniture, fabric, toys as passengers, the choice is yours!

Use your train to go on an imaginary journey – where will you go? What will you see? Where do you end up?

Here are some ideas to help you. Have fun!

Answers

We are sure your train models are amazing! We would love to see some of them on our Facebook page!
