

## Yr 2, 06.07.20 answers

### Maths- sharing

There are **12** cubes altogether

There are **2** boxes

There are **6** cubes in each box.

Yes you can share 12 cubes equally between 3 boxes. Each box will have 4 cubes.

24 children in 4 teams:

There will be 6 children in each team.

Another way could be:-  $20 \div 5 = 4$

### Problem solving

Jack says,

I can work out  $40 \div 2$  easily because I know that 40 is the same as 4 tens.

This is what he does:

$$40 \div 2 = 20$$

Is it possible to work out  $60 \div 3$  in the same way?

Prove it.

Is it possible to work out  $60 \div 4$ ?

What is different about this calculation?

Possible answer :

For  $60 \div 4$  the children will need to exchange 2 tens for 20 ones so they can put one 10 and 5 ones into each group.
