

## Maths

This week we will be thinking about numbers. Begin by writing numbers 0 to 9 on separate pieces of paper. Make sure you write them all the right way round! Now turn them face down and play a game with another person. Turn 2 numbers over each and place them next to each other to make the greatest or highest number you can. Think carefully which number will come first to make it higher. To make it easier you could just use one number. Whoever has made the greatest number earns a point (or a counter, button or coin, etc.). The winner could be the first person to get ten points!

We know some of you like a challenge so to make it really hard you could turn over 3 numbers to make really high numbers! Have fun!

## Answers

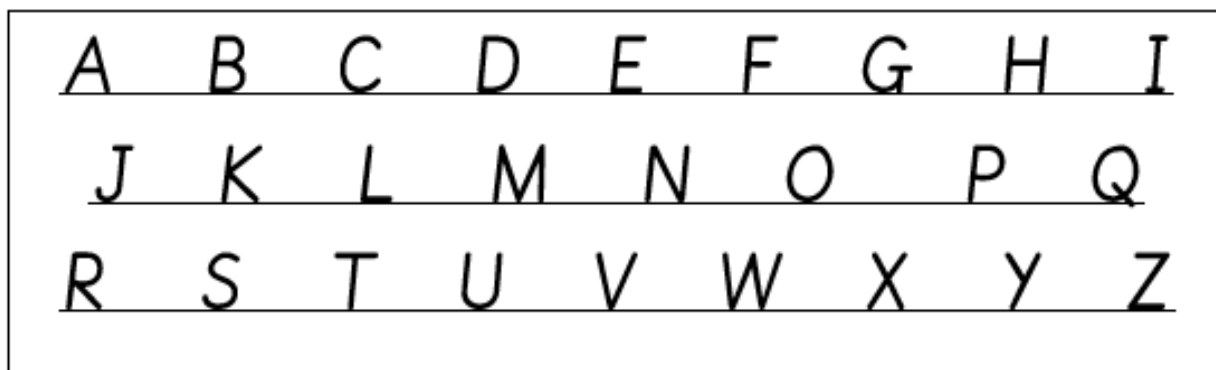

**There are no right answers but we hope you enjoyed the game!**

## Literacy

Today we would like you to practise your letter formation. Look at the letters below and practise writing them, starting at the bottom with the 'whoosh'. Try to use lined paper if you can and make letters b, d, h, k, l, and t, tall. Remember that part of letters f, g, j, p, q and y go under the line.

Now practise writing capital letters!

Can you say the alphabet? Remember that when we say the alphabet we say the names of the letters. Practise this with an adult and have a go at saying letter names with the video linked below.

It is important that we can all write our first and second names as we get ready to move into year 1! Practise writing both names using neat, small writing and forming your letters correctly. Keep practising until you can do it really well!

### Answers

**Well done if you formed your letters correctly and managed to write your name independently!**

### Foundation Subject – The World

Today we are going to think about people who support us. Have a chat about what it means to 'support' someone. We all need others around us to give us support. How might the people below give us support?

big brother

big sister

lollipop person

doctor

Can you think of any other people who give you support? I am sure there are lots more! Using a piece of paper, draw yourself in the middle and write the word 'support'. Now draw and label around you as many people as you can who give you support! How lucky you are to have so many wonderful people to support you!

### Answers

**There are lots of people you might have added to your picture such as people in your family, dentist, delivery driver, nurse, friend, neighbour or teacher!**
