

Year Four answers 29/6/20

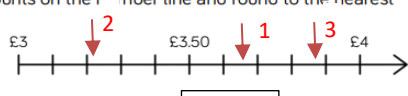

Maths

Today, you are going to be estimating amounts of money. Remember when we estimate, we are not using the exact amount but thinking about a number which is close to it. By estimating we will make the numbers easier to use. You might estimate amounts when trying to work out if you have enough money to buy items in a shop. For example you might have £10.00 and want to buy something which is £3.75 and £5.20. If we use estimating we can add together £4.00 (as it is the closest pound to £3.75) and £5 (as it is the closest pound to £5.25). $£4.00 + £5.00 = £9.00$ therefore I will know that I have enough money to buy the items. To estimate the amounts you need to round the amounts up or down to the nearest pound. If you have less than 50p in the amount, you round down. If you have 50p or more in the amount, then you round up to the next pound. By placing amounts on a number line, you can see which pound your amount is closest to.

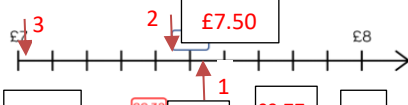

Fluency

Place the amounts on the number line and round to the nearest pound.

- £3.67
- £3.21
- £3.87

- £7.54
- £7.45
- 701p

Complete this number line.

Complete the table by rounding each amount and finding the total.

Item 1	Item 2	Approximate Total
£5.63	£1.76	$£6 + £2 = £8$
£3.05	£11.54	$£3 + £12 = £15$

Annie has £15 to spend at the theme park. She rides on the roller coaster which costs £4.34. Then she rides on the big wheel which costs £3.85. Approximately how much money will she have left?

$$£4 + £4 = £8$$
$$£15 - £8 = £7$$

Reasoning

Mo buys socks. He estimates he'll spend between £3.50 and £4.49. £4 + £5 = £9. The gloves could cost between £4.50 and £5.49. What could the socks and gloves have been?

Mo has £12. He says he has enough for three pairs of socks. Do you agree? Explain why.

It depends. If the socks cost £3.50 to £4, he will. If the socks cost £4.01 to £4.49, he will not.

Mastery

Tommy - car
Amira - computer game and rugby ball
Eve - panda

but gets change from £5. Amir buys two toys which total approximately £25. Eva's toy costs 5p more than the number the cost rounds to. If you had £30, what combinations could you buy and what would you have left? Various answers

English

- Jason trained to be a hero with Chiron. What kind of creature was Chiron? **Chiron was a centaur.**
- Why didn't Hera like Jason's uncle Pelias? **Hera didn't like Pelias because he forgot to include her when he made a sacrifice to the gods.**
- Why was Pelias afraid of Jason? **Pelias was afraid of Jason because he had been warned that a young man wearing only one sandal would be the next king. Jason lost one of his sandals in the river so when Pelias first saw him he was only wearing one.**
- What is a fleece? **The fleece in this story is the wool of the magic ram that saved Phrixus.**
- What was special about the ship 'The Argo'? **'The Argo' had a magical figurehead made of oak at the front of the ship that could talk. The goddess Athena put it there to offer advice.**
- How many of the Argonauts do we already know? **We already know two of the Argonauts- Heracles and Orpheus.**
- What happened to Heracles? **Heracles got left on an island because he wouldn't leave after his friend, Hylas, went missing there.**
- How do you think Jason and the Argonauts will defeat the Harpies? **Read the next part of the myth that I've uploaded today and see if you were right!**

Foundation Subject – Art

This week for your art, you are going to continue drawing insects but this time have a go at using some colour also. Please look at the 'Art lesson slides' which have been uploaded to explain your task. I would love to see some of your artwork in the comments on Facebook!
